# Soil Respiration - Regenerative vs Conventional

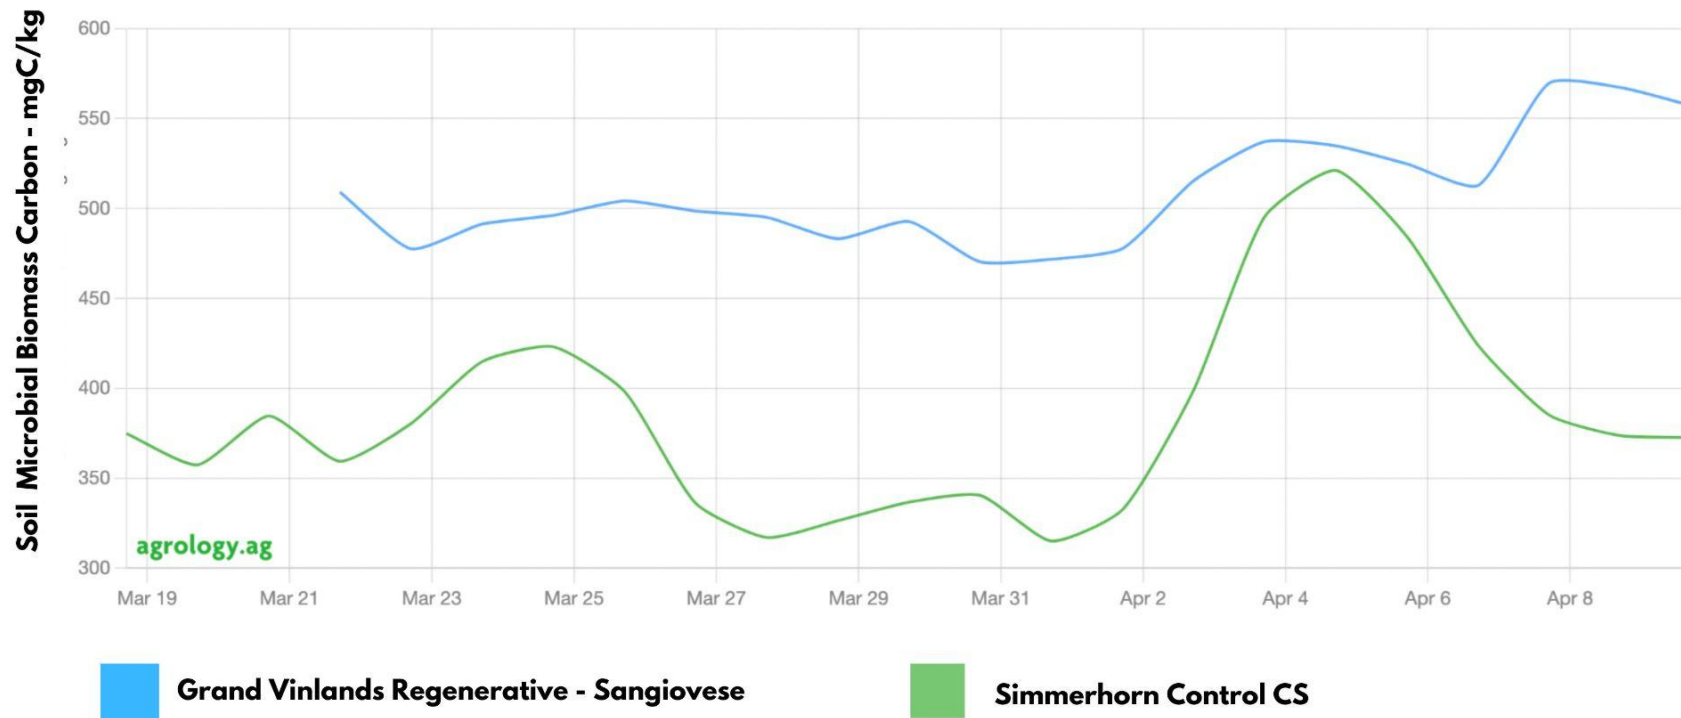

VINO FARMS, LLC

# Microbial Biomass Carbon in Regen vs Conventional

VINO FARMS, LLC

# Vineyard Soil Health Report

VINO FARMS, LLC

Total Carbon (TC) and Soil Organic Carbon (SOC) concentrations (shown as percentages) for both the vine and alley rows for each vineyard block. Color codes represent the percentile in which the vineyard block ranks compared to other vineyard blocks of similar texture in this project.

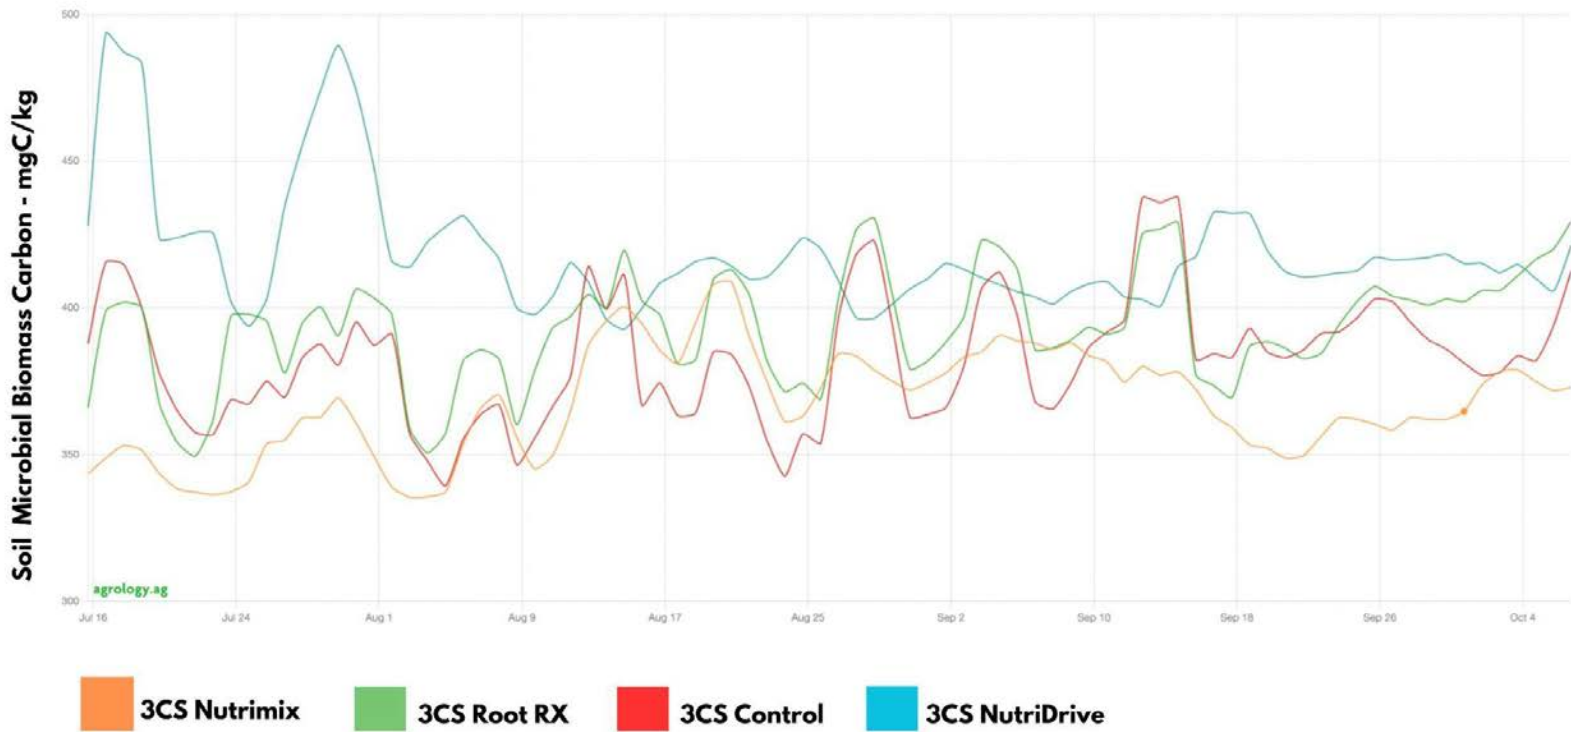

Red= 0-20% percentile, orange = 20-40% percentile, yellow = 40-60% percentile, light green= 60-80% percentile, and dark green = 80-100% percentile.

Block Name	TC Vine (% Carbon)	TC Alley (% Carbon)	SOC Vine (% Carbon)	SOC Alley (% Carbon)	Practices
Cherry Road Block 1	0.91	1.47	0.89	1.44	CC, compost, NT, Grazing,
Cherry Road Block 3	0.91	1.08	0.89	1.06	CC, compost, Grazing
Vista Luna	1.32	1.48	1.28	1.44	CC, compost, Grazing
Jack Tone	0.89	0.92	0.87	0.90	CC, NT
Grand Vin Lands	0.55	1.03	0.52	1.00	CC
Simmerhorn	0.74	1.07	0.72	1.02	CC
Nance	0.74	0.93	0.73	0.90	CC

# Microbial Biomass Carbon - Biologic Trial at Simmerhorn

VINO FARMS, LLC

# Spring Respiration in Biologic Trial

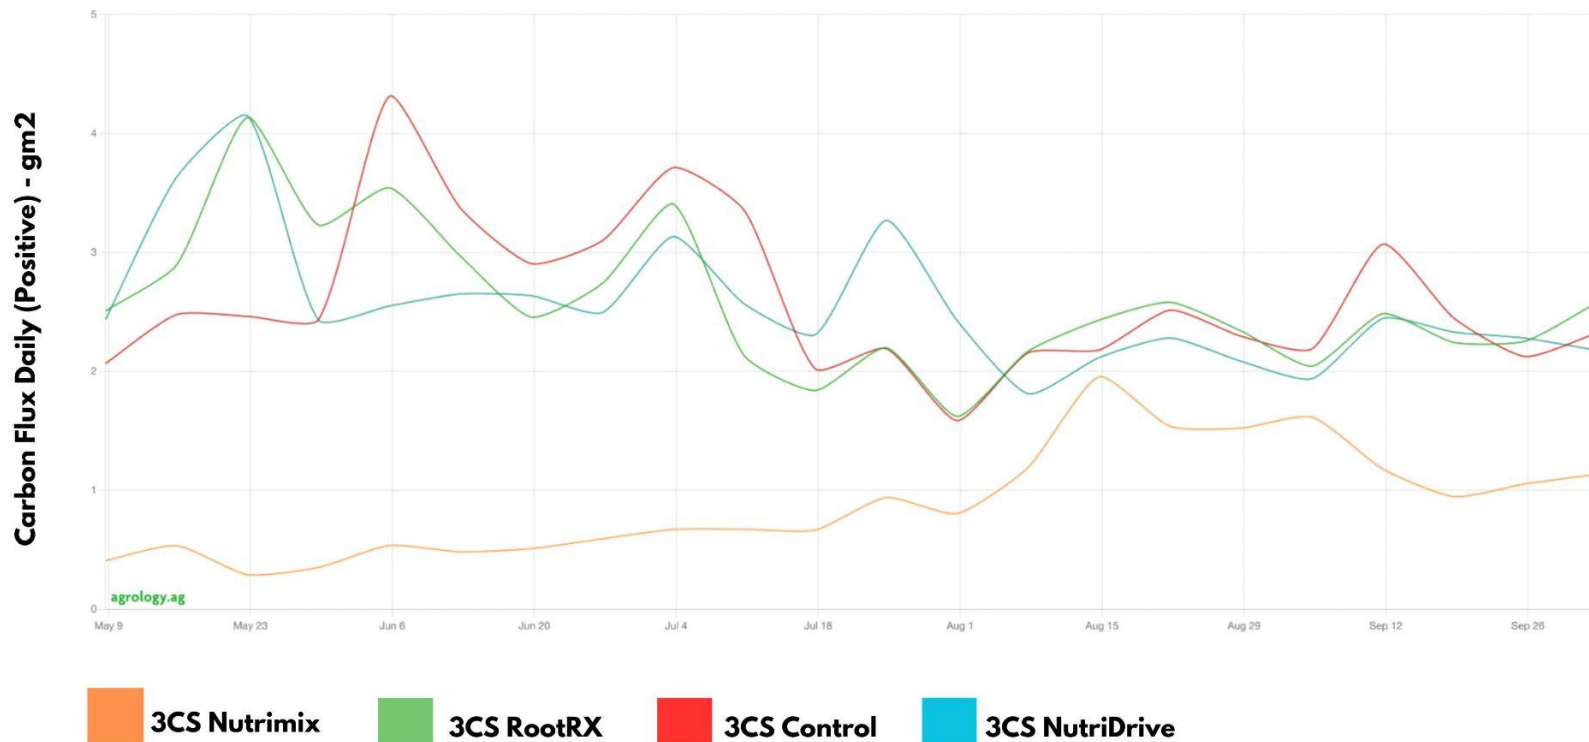

VINO FARMS, LLC

VINO FARMS, LLC

# Summer and Harvest Respiration in Biologic Trial

# Cost Per Acre Breakdown

VINO FARMS, LLC

Product	Cost
Nutri-Drive	\$7 per application
NutriMax	\$35 per application
Root RX	\$41 per application

**Nutri-Drive was one of the best performers  
5-6x lower cost**
